DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a system for playing an interactive sports simulation game comprising a network that transmits said interactive sports simulation game to a plurality of viewers that receive and display said interactive sports simulation game, classified in class 463, subclass 40 and class 725, subclass 139.
 - II. Claims 9-16, drawn to a system and method of/for playing an interactive broadcast sports simulation game comprising displaying a unique user interface on an interactive device for each participant of said interactive sports simulation game, classified in class 348, subclass 14.03.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because displaying a unique user interface on an interactive device for each participant of said interactive sports simulation game is not required by a broadcast network to transmit a signal to viewers. The subcombination has separate utility by itself, such as, a touch screen interface to guide a player through game menus.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. If Group I is selected, then the following election of species applies:

- Species A, where the system for playing an interactive sports simulation game includes a broadcast network as set forth in figure 1 and drawn to claims 1-4.
- Species B, where the system for playing an interactive sports simulation game includes a set top box as set forth in figure 2 and drawn to claims 5-8.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott E. Jones whose telephone number is (703) 308-7133. The examiner can normally be reached on Monday - Friday, 8:30 A.M. - 5:30 P.M..
